This Test Project proposal consists of the following documentations/files:

1. WSG2025_TP39_MD_en.pdf

2. Vorlage-leere-Präsentation_WSG_SW_03.01.2024_V1.potx

Introduction

Network technology knowledge is becoming essential nowadays for people who want to build a successful career in any IT engineering field. This test project contains a lot of challenges from real life experience, primarily IT integration and IT outsourcing. If you are able to complete this project with the high score, you are definitely ready to service the network infrastructure.

Description of project and tasks

Communication and interpersonal Skills

Instructions to the Competitor

We would like to hear a short presentation from you personally at the beginning of the World Skills Competition week. There is a PowerPoint template for this, so please use this if possible. It would be nice if you could introduce yourself in English. After all, this is the general language of communication in the IT sector, English is an integral part of the training program and language skills are also important in international competitions.

The aim of the presentation task is to give us an insight into your IT interests and your career. It could include topics such as your favorites, IT topics/exercises, why you are here, what inspires you. You are also welcome to share other things about yourself, such as where and how you live, what you like to do in your free time, any hobbies, idols, dreams for the future, etc.

Your presentation should not take longer than 5 minutes. The effort will not be in vain. The presentation is part of the competition and will be judged. You will need to bring your presentation on a USB stick.

We look forward to getting to know you!
